PROFILE

Restaurateur turned developer with a passion for bringing user client ideas to life. While I currently specialize in front end development, javascript and interactive maps, I am eagerly expanding my knowledge of backend concepts with the goal of securing an intermediate full-stack role. I bring experience developing responsive web applications using Javascript, React, HTML and CSS.

Whether through your physical or digital space, my passion is in creating unique and memorable experiences that people want to share.

FEATURED PROJECTS

Project I Ontario Line Map • HTML | PHP | CSS | JS | API

LIVE LINK

- Interactive map displaying tons of information on the new Toronto subway line, currently featured on the Metrolinx website

Project II College Navigator • HTML | CSS | JS | React | Sass | Firebase | API

LIVE LINK || GITHUB

- An App for prospective post secondary students looking to search, track and keep notes on their favourite school options.

WORK EXPERIENCE
